SOFTWARE DEVELOPER SUMMER INTERNSHIP - DATA SERVICES

Citi's OTC (Over The Counter) Derivatives Data Services Team builds and maintains software used to compute metrics that help mitigate the financial risk to counterparties.

As part of a team of supportive professionals, you will be responsible for:

- Writing code to validate business requirement changes
- Implementing changes in large applications following industry leading standards
- Refactoring and re-implementing old/legacy code
- Visualizing graph based execution flows
- Automating library upgrades and dependency checks

What we offer:

- Opportunity to gain knowledge in a multinational team and to learn about the financial domain
- Opportunity to learn about technologies from experts: Java, SQL, Mongo, git, Bash
- Transparent career routes and opportunity for future full-time positions
- Creative, inspiring, multinational work atmosphere
- A socially active team and communities with diverse networking opportunities

Whom we think will be a good fit:

- Currently completing a BSc/MSc in Computer science/Electrical Engineering/Mathematics - Active Hungarian student ID is needed
- Excellent verbal and written English
- At least basic knowledge of Java, git/svn, SQL, Unix systems
- Familiar with at least one IDE
- Proactive attitude

Program start date: 14 June 2021

Your journey and flexible career at Citi begins here - apply now!
