CITI TECHNOLOGY GRADUATE ANALYST

Your typical placement will look like this:

During the two years in the program, you will build the necessary professional skills for future leadership positions by participating in two different rotations based on your aptitude.

Below are some examples of potential assignments you could work on in the program:

- Project management
- Business analysis and risk management
- Creating dashboards and scorecards to summarize data
- Automating analytical processes
- Performing web and mobile application testing
- Performing Information Security/Compliance reviews on software and hardware
- Vulnerability and penetration testing
- Engineering and operational opportunities within network and voice services
- Software development

We want to hear from you if...

- You have recently obtained a Bachelor's or Master's degree in Information Technology, Engineering, Management, Information Security, or any other analytical or technical-related degree is an advantage, but not a requirement
- You have an interest working in a high tech global technology environment
- Knowledge of scripting languages, application development, and databases is an advantage, but not a requirement

You will be a great fit if...

- You are a confident English speaker
- You have commitment to personal growth and a strong desire to learn
- You have strong communication, planning and organizational skills
- You are an analytical thinker
- You have commitment to integrity and ethical decision-making
- You have a client focused mind-set
- You are a collaborator seeking the help of colleagues and recognizing the value of teamwork
- You are an innovator who can think creatively
