

## Aximmetry Consultant

Aximmetry is hiring a consultant person with an affinity for programming to help our international customers using our broadcast graphics software.

### Responsibilities:

- Learn to use the user interface of Aximmetry at a very competent level
- Creating small visual programs or tutorial videos for Aximmetry
- Communicating with customers to understand and solve their problems
- Training customers to use Aximmetry
- Installing and configuring the necessary software and hardware on location

### Requirements:

- Knowledge of Windows IT
- Some knowledge of programming (it can be a visual or script type)
- Good command of spoken and written English
- Ability to train customers in English to use the software
- Willingness to travel (**after COVID-19 risks diminished**)

### Advantages:

- Knowledge of Unreal Editor or Unity
- Knowledge of broadcast studio systems
- Knowledge of Chinese
- Drivers license

### Aximmetry offers:

- Training
- Full-time employment
- Competitive salary
- Flexible working hours
- A unique growth opportunity
- An interesting, challenging environment
- The ability to learn rapidly
- Currently we prefer working from Home Office but there is also the possibility of working in our modern, pleasant office (disinfected daily) if preferred
- Progressive Management
- International projects
