

## About the Scale-up Program

Put your career in hyper-growth mode! Our 6-month Scale-up Program is designed to provide engineering students and fresh graduates with **hands-on experience and development opportunities**, accompanied by mentoring and regular training. Our not-so-secret goal is to upscale our trainees to Junior Engineer level and at the end of the program, offer full-time positions to the high-performing ones.

### How is this program different from other internships and fresh grad programs?

- » You will work on **highly impactful, real projects**
- » You will receive internal and external training throughout the program
- » You will have a mentor assigned to you to guide your professional growth
- » If hired after completing the program, you will get stock options
- » You will participate in team buildings with your peers and a hackathon at the end of the program

### Our Scale-up Program is for you if you:

- » Are studying or freshly graduated in Computer Science or any related technical field
- » Can work at least 30 hours/week
- » Are proficient in English, both written and verbal
- » Have excellent logical-analytical skills
- » Have a positive mindset and a solution-oriented attitude
- » Are comfortable with working in a highly agile environment
- » Have high motivation to work with and learn from the best professionals in the field
- » Are curious to find innovative solutions to challenging problems
- » Can work independently and take ownership of delivering high-quality solutions
- » Bonus: Having previous experience in software engineering at a startup or tech product company is a plus

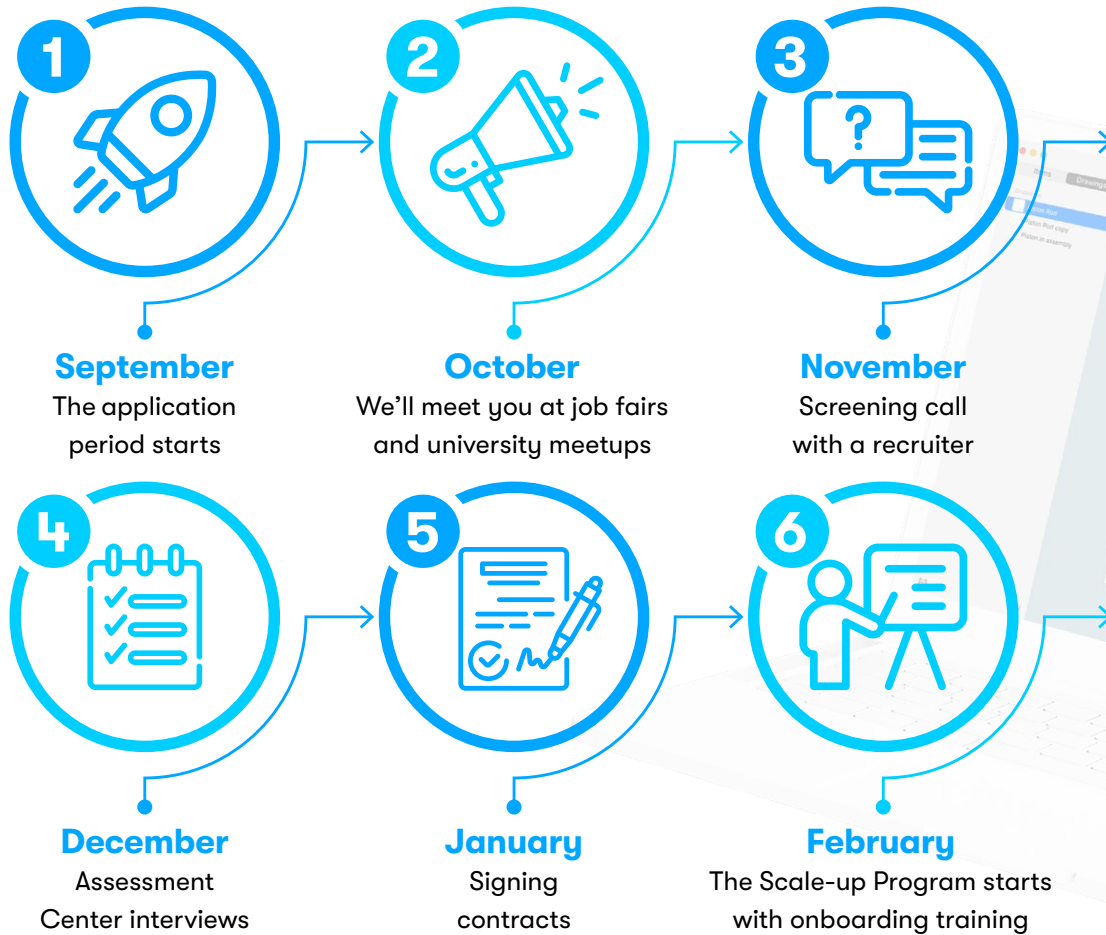

### Benefits

- » Our trainees in the Scale-up Program will receive a junior developer salary and our **full benefit package** will apply to those who have successfully completed the program and been offered a full-time position.
- » During the 6-month program, you'll do more than learning and growing within your team. You will take **ownership of solving complex problems**, building an awesome product, and developing new features. You'll be challenged to take on projects that have a direct impact on our mission: **taking the CAD industry to the 21st century.**
- » If all this speaks to you, apply to our Scale-up Program and **grow with us!** And don't worry if you don't tick every box in the requirements. We're always looking to hire for potential and the right mindset.

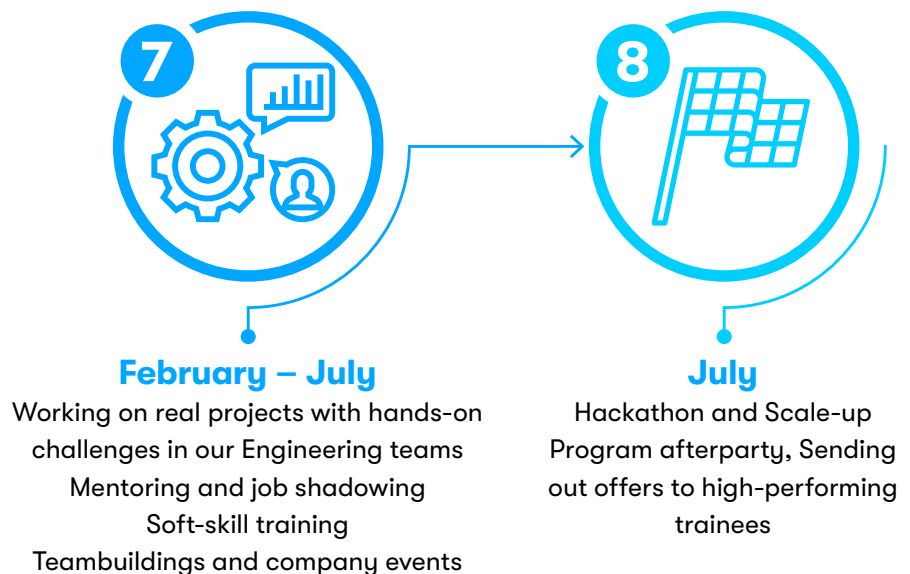

**Take your career to a new dimension**
