

Clients in 160 countries count on our #1 ranked platform to help them navigate markets and make trading decisions.

What progress will you make?

INTERNSHIP IN MARKET QUANTITATIVE ANALYSIS

Start your career at Citi Hungary as a Markets Quantitative Analysis Intern!

Markets Quantitative Analysis Department (MQA) is a division of the Global Markets business and has responsibility for providing the analytical models, which are used for pricing securities and risk managing the Firm's positions throughout the Markets' businesses. The scope of this work extends from the research into the mathematical derivation of the model, to the coding, testing, and documentation of the model for formal validation and approval, and finally to delivering the model both to the Trading Desk and to Technology.

We have **3-month paid internship programs** at Citi MQA each season:

- Spring: from mid-March 2022 - part-time or full-time
- Summer: from mid-June 2022 - full-time
- Autumn: from mid-September 2022 - part-time or full-time

Whom we think will be a good fit:

- Currently completing a BSc/MSc/PhD in Computer Science, Engineering, Maths, Physics, Economics or similar
- Good verbal and written English skills
- Working knowledge of Microsoft Excel
- Knowledge of programming/scripting languages such as C++ or Python
- Excellent numerical and analytical skills

We offer exceptional training through work on current global financial technologies - apply now [via this link!](#)
