

Name of subject: Project work (ONLY FOR DESIGN STUDENTS)	NEPTUN-code: RTTPM1ETNE	Number of hours: <i>lec+gs+lab</i> 0+0+2	ECTS: 8 Requirements: practice mark
Course coordinator: Rita Kendrovics Boda Phd	Title: associate professor	Prerequisite: RTTTT3EENE Integrated product design III. (interior)	
Subject content:			
<p>The purpose of the subject is that the students could use the theoretical knowledge, acquired in the framework of the professional subjects, in practice-oriented projects. The 3-4 strong student groups (occasionally independently as well) learn the workflows – from the raising of the problem through working out the basic ideas, to form experiments – in complex work. The students will get to know the appropriate distribution, time management of the work-phases. They will learn how to make a schedule and to co-ordinate the workflows. After collecting international information and analysing them, the students will design a trend collection for a given group of firms. They cooperate regularly with their consultants and the competent contact persons of professional organisations and firms. In written form and in presentations, too, the students will report their workflows and results and they will make their portfolios. When carrying out these tasks, in addition to their skill in solving problems, creating forms and in design as well, the adaptability and communication skill of the students will also develop, thus they can get a good background for joining the professional circles.</p>
